**09**

Pre-integrated with most common peripherals

**05**

20% increase in Staff Utilisation, improved analytics and control

**10**

Improved customer engagement, improved customer service.

True transformation experience is only realized when both the customer and the staff benefit.

## Business Owner Information

### SERVER-BASED SOLUTION

We put the business logic on a server in your data center. We connect the server to your back office systems including your core and CRM etc. We aggregate the data from multiple sources and multiple channels to provide your customers with a true omni channel experience. Application works on a browser at the Teller station, or on a tablet within the branch

### BRANCH FLEXIBILITY

Finding the optimal branch balance to service customers is a difficult task. Having the right solution implemented in the branch network can allow financial institutions focus on the service each branch should offer. Antuar's software allows banks to adapt each branch configuration as they see fit.

### INNOVATION

inBranch Transact provides many innovative features, some of which are

- Remote Authorizations by smart phone or other registered device.
- Queue Busting, Geo-Location, and customer information allowing better interaction with customers in less time
- Cash Planning, Front to back Workflows, Cloud enabled solution etc. etc.

### UNIVERSAL BANKER

Tablet interfaces for staff means they can interact with the clients and direct them if required. It gives them the ability to view client details and approve transactions if needed. Tablet interface can also link to your sales and service applications to proactively help sell.

### IMPROVE COST/ INCOME RATIO

Automate administrative tasks, provide better information to the branch staff, improve customer experience,

- Improve Staff Utilization by 40%
- Improve Customer Retention
- Increase Sales in the branch by up to 20%
